- 2.2. Post Types
- 2.3. Featured Image
- 2.4. Homepage
- 2.5. Navigation
- 2.6. Widgets

1. GETTING STARTED – INSTALLATION

To install this theme you must have a working version of WordPress already installed.

1.1. CURRENT WORDPRESS VERSION

Make sure you've got the current version of WordPress . In order to download the current version, please visit <http://wordpress.org>.

Please check http://codex.wordpress.org/Installing_WordPress for information on how to install WordPress on your server.

1.2. INSTALLING THE THEME

Once WordPress is successfully installed, you can install the theme in two ways: via FTP, or through WordPress.

Via FTP

1. Un-zip the theme main file and upload the folder via a FTP program to the **/wp-content/themes/** folder on your server.

Through WordPress

2. Use WordPress Theme Installer. Go to **Appearance > Themes > Install Themes > Upload**, and select the zipped theme file.

1.3. ACTIVATION

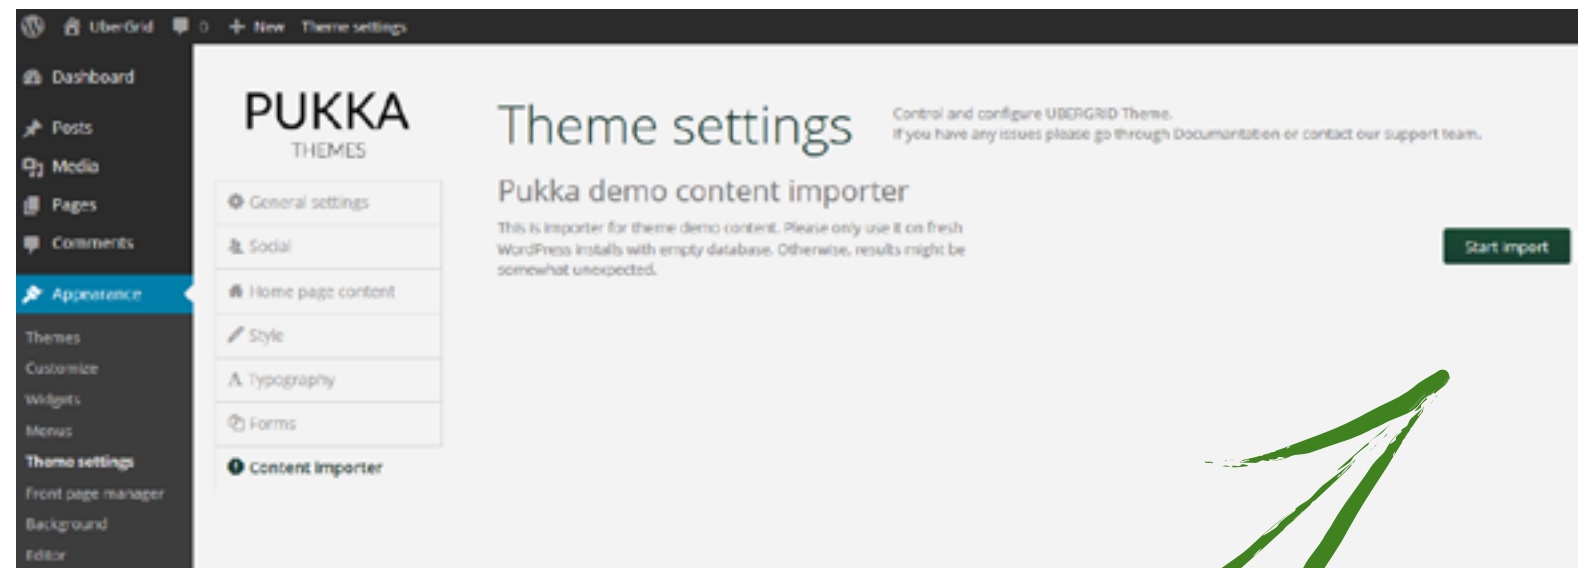

Once the theme is installed, you'll just have to activate it in **Appearance > Themes > Manage Themes**.

1.4. CONTENT IMPORTER

Before you can get started with your ÜBER-GRID theme and have it look as the demo, you first need to add content to WordPress.

If you prefer to preload our demo content into your theme to start with, go to **Appearance > Theme Settings > Content Importer**.

Just click the “Start import” button. Please only use it on fresh WordPress installs with empty database. Otherwise, results might be somewhat unexpected.

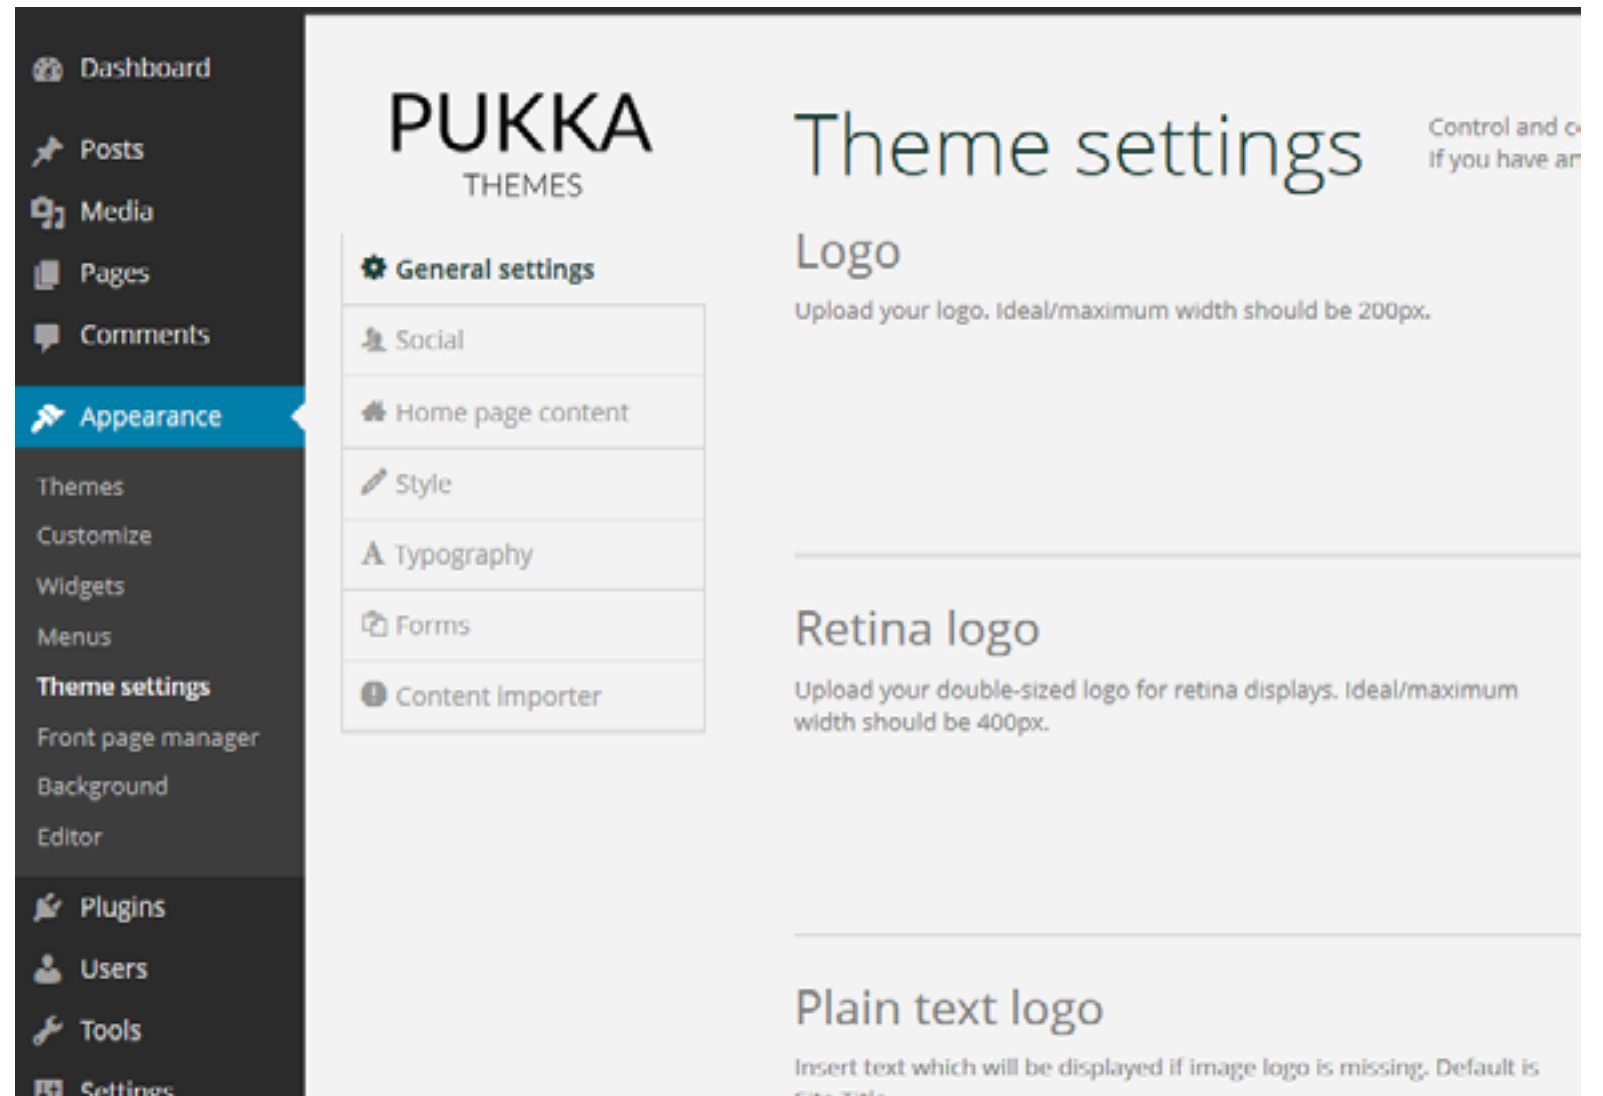

2. SETTING UP YOUR SITE – THEME OPTIONS

The ÜBERGRID theme comes with an easy Theme Settings Manager (**Appearance > Theme settings**) divided into six tabs:

GENERAL SETTINGS
SOCIAL
HOME PAGE CONTENT
STYLE
TYPOGRAPHY
FORMS

*Each field is accompanied by a short help text.
If you have any issues contact our support team.*

2.1. GENERAL SETTINGS

Use General Settings Tab (**Appearance > Theme settings > General settings**) to set up basic settings of the theme (logo, analytics code, favicon and etc)

Logo

Upload your logo. Ideal/maximum width should be 200px.

Retina logo

Upload your double-sized logo for retina displays. Ideal/maximum width should be 400px.

Plain text logo

Insert text which will be displayed if image logo is missing. Default is Site Title.

Plain text logo color

Color of the text logo which is displayed if image logo is missing.

Logo for Mobile Menu

Logo image for Mobile Menu. Maximum/Ideal height is 36px.

Favicon

Upload your favicon image. Image pixel dimension must be in square aspect ratio (meaning height must be equal to the width). Acceptable dimensions: minimum 32x32px, maximum 64x64px (.PNG)

Analytics code

Paste your tracking code here. (Google Analytics, AWStats, Piwick, Statcounter, ...).

Copyright text

If you have Copyright text insert it here. Copyright will be published below navigation.

Single author site

Select this feature in order to hide author's name from specific pages and post categories.

Hide language switcher

Select this feature in order to hide default language switcher (flags).

Right sidebar width

Here you can select the right sidebar width.

Use page builder in posts

Select this feature in order to enable using page builder in posts.

Use grid layout for categories

Select this in case you want to have grid layout for categories.

Use grid layout for categories

Select for which categories you want to use grid layout. It will be used for all if no category is selected.

Default category Box Size

Select default Box Size for categories. This is important if you are using grid layout for

2.2. SOCIAL

Use Social Tab (**Appearance > Theme settings > Social**) to set up Social Buttons and links.

Insert your Facebook App ID. This means you now need to create a Facebook app to perform integration. Don't worry, creating an app is easy, you don't need to be a developer to create an app here. Visit <https://developers.facebook.com/apps/> and click create new app. If you are using some other Social plugin, then you should Disable Facebook Open Graph Tags.

You can enable Social Buttons for posts (Facebook Like, Tweet, LinkedIn, Pinterest) and you can also disable Social Buttons on Pages.

If you want to have Links (icons) below the Menu, then simply enter your social profile URL in the Link input field. For example, enter 'http://www.facebook.com/pukkathemes' for the Facebook Fan Page link.

2.3. HOME PAGE CONTENT

Use Home Page Content Tab (**Appearance > Theme settings > Home Page Content**) to set up your home page.

Front page grid display

Choose this feature if you want front page to use grid based display.

Use Front Page Manager

Select this feature in order to manage front page boxes from Front Page Manager. In case you don't select this option, latest posts will be published on your front page.

Enable infinite scroll

Choose this feature in order to enable infinite scroll (endless page) on your homepage.

Max number of front page boxes

Set up maximum number of boxes on your homepage. Also, this number is the number of boxes loaded if using infinite scroll.

Max front page width

Set up maximum width for your front page by choosing number of columns. One column equals small or medium box width.

Default Box Size

Choose default box size. We would recommend you choose this, especially if you are not using Front Page Manager.

Home page Box Date

Choose do you want to show Dates of Posts/Pages on Home page Boxes.

Right sidebar on Front Page

Choose do you want to enable Right sidebar on Front Page.

Front Page Categories

If you want to show only latest posts from certain categories on your homepage, then you can select categories here. Keep in mind that this will work only if you aren't using Front Page Manager.

Block sizes

Here you can change block width, height, margin, image width and image height. Keep in mind that you are changing medium box, and that other box sizes are calculated automatically from this setting, so choose wisely.

2.4. STYLE

Use Style Tab (**Appearance > Theme settings > Style**) if you want to change text colors. Also you can add CSS changes here.

2.5. TYPOGRAPHY

Use Typography Tab (**Appearance > Theme settings > Typography**) if you want to change typography of the theme.

2.6. FORMS

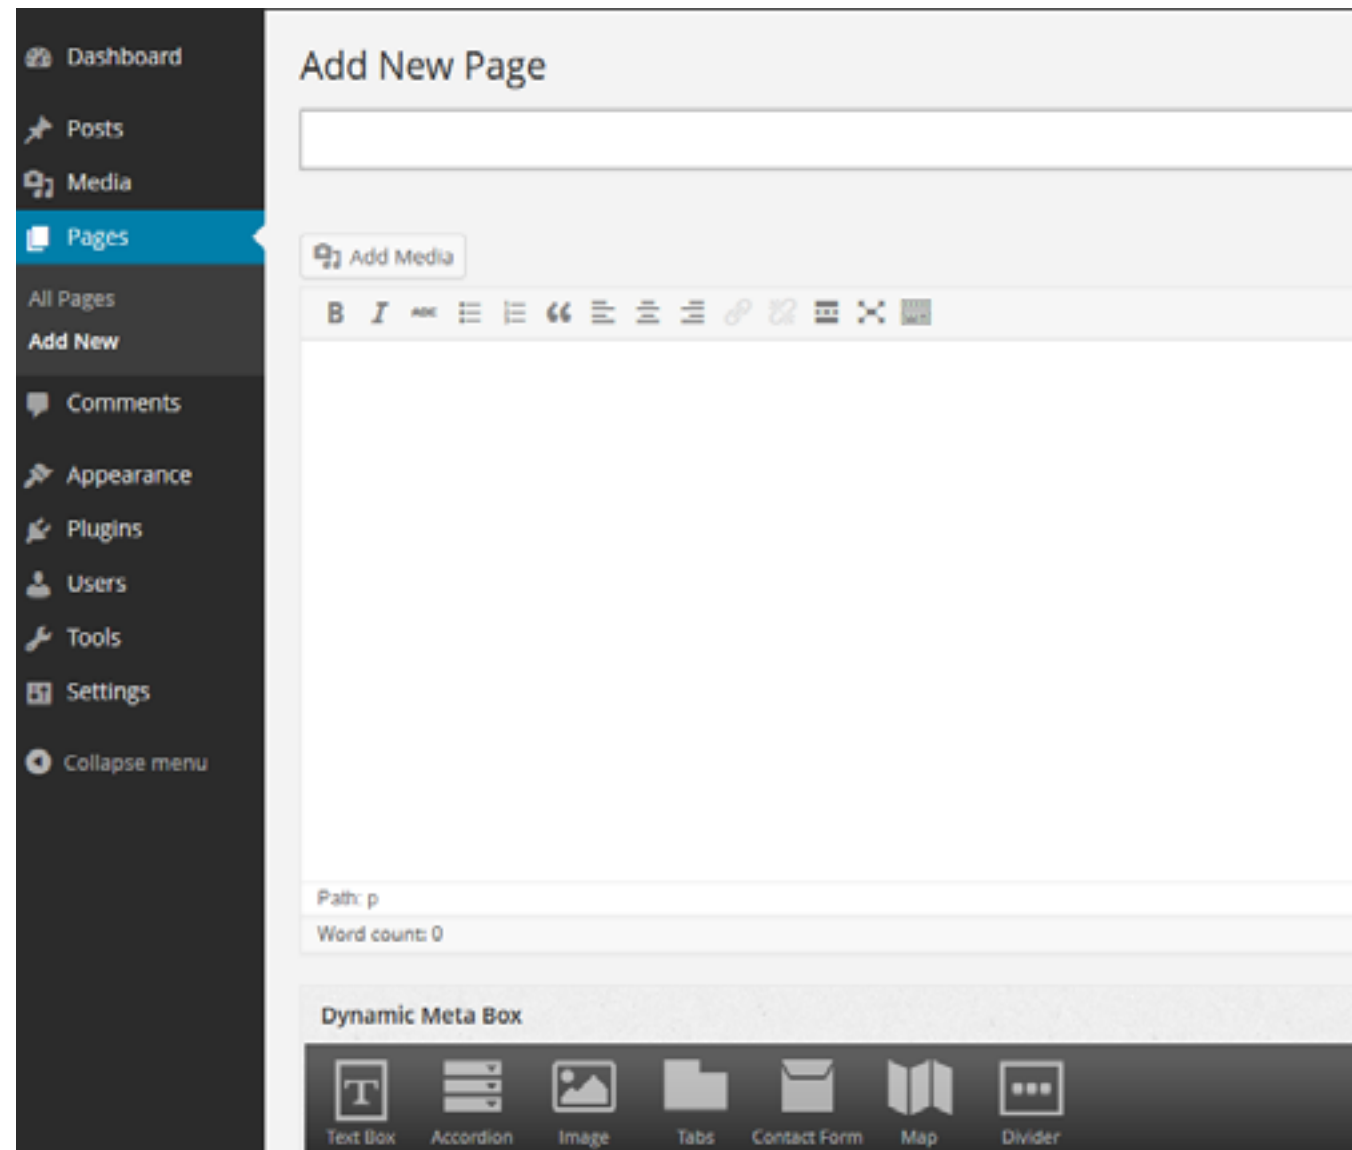

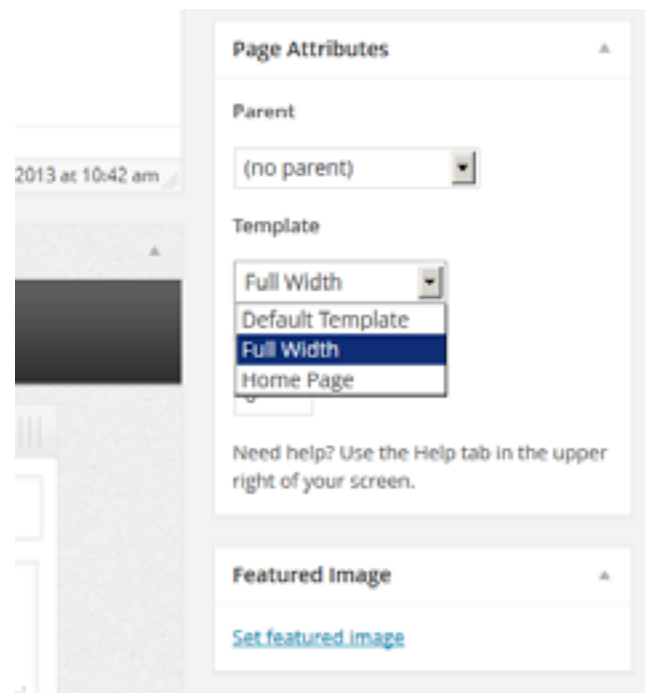

Use Forms Tab (**Appearance > Theme settings > Forms**) to set up email, thank you page and error notification. All emails from custom Forms (**Page Builder**) will be sent to this address.

3. BUILDING YOUR SITE

3.1. PAGE BUILDER

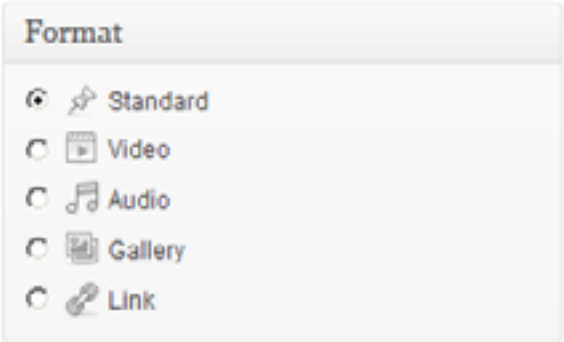

You can easily create custom Page by using Page Builder. You can add **Text Box, Accordion, Image, Tabs, Contact Form, Map** or **Divider**.

If you want to have Page without right sidebar, then you just need to choose 'Full Width' Template from Page Attributes.

3.2. POST FORMATS

You can choose different Post Formats: **Standard, Video, Audio, Gallery** or **Link**.

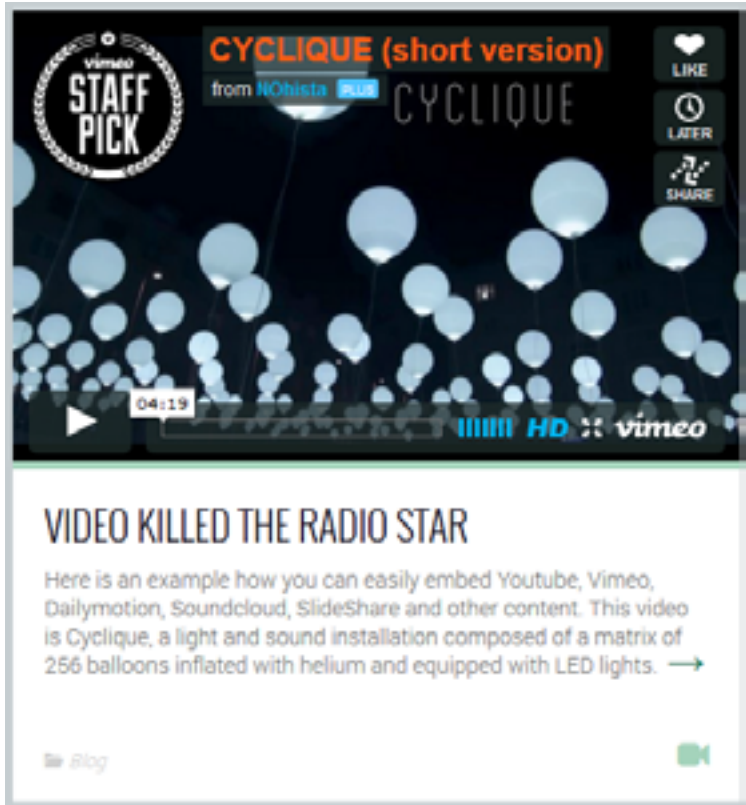

Video and Audio Formats

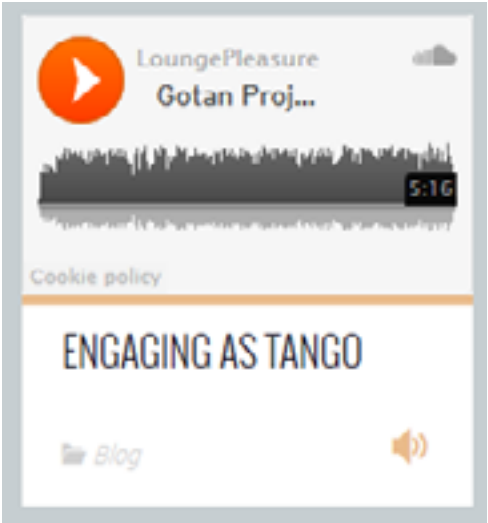

If you choose Video or Audio Format, then simple insert Meda URL in Post Formats Box. Here you can check all supported types http://codex.wordpress.org/Embeds#Okay.2C_So_What_Sites_Can_I_Embed_From.3F%29

Video home page box (Vimeo)

Audio home page box (SoundCloud)

Link Format

If you choose Link Format, then simple insert Link in Post Formats Box. You can publish this box on your Homepage and it will link to your external URL.

Post Formats

Media URL

Youtube, vimeo, dailymotion, soundcloud..
(complete list: http://codex.wordpress.org/Embeds#Okay.2C_So_What_Sites_Can_I_Embed_From.3F)

Media embed code

Enter here embed code from any other media service. Width should be set to 615px.
(YouTube: put `?wmode=transparent` after youtube link, e.g. <http://www.youtube.com/watch?v=cZUIMixMMz?wmode=transparent>)

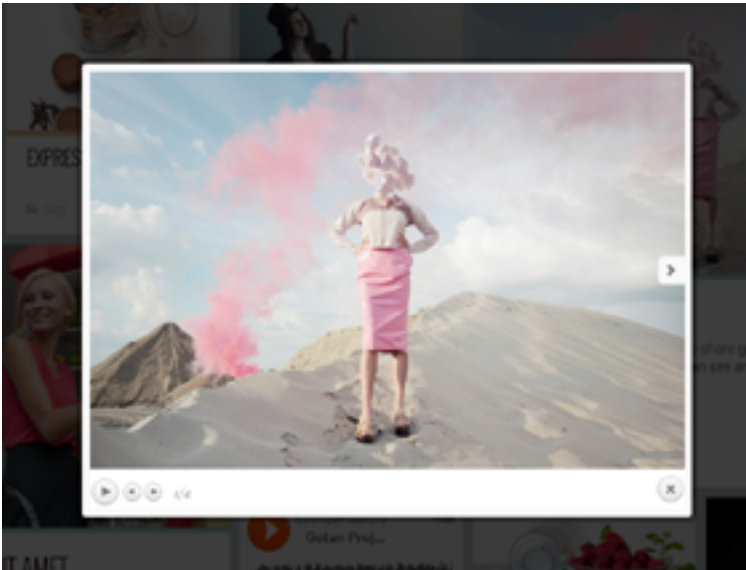

Link

Insert the URL you wish to link to.

Gallery Format

If you choose Gallery Format, then all images uploaded to that post will be published above the title. Here is an example

Also homepage box of this post will have gallery.

3.3. FEATURED IMAGE

Set **Featured Image** to your Page and Posts.

Here you can see example of Post with Featured Image (above the title)

☒ Blog

☐ Uncategorized

[+ Add New Category](#)

Tags

Add

Separate tags with commas

[Choose from the most used tags](#)

Featured Image

[Set featured image](#)

3.4.HOMEPAGE

You just need to check **Featured post** option if you want to publish your post on Homepage.

Also you can choose Box size (small, medium and big) and upload Secondary image (image for Homepage only).

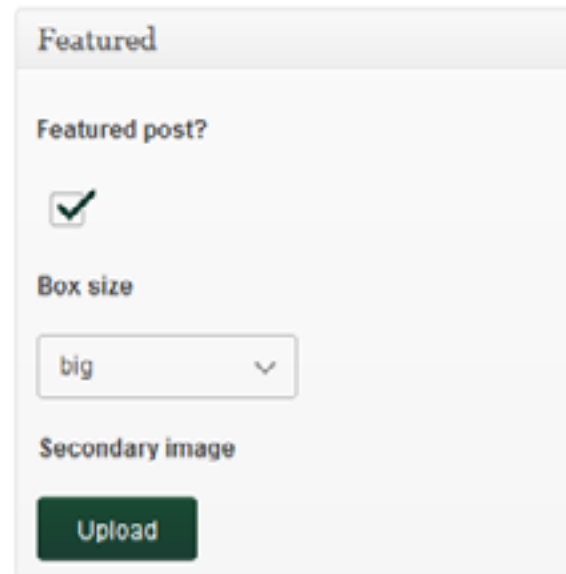

If you don't have Secondary image then Featured image will be shown on Homepage.

Dimensions for Secondary image:

Small box: 225x140px (450x280px for Retina displays)
Medium box: 225x290px (450x580px for Retina displays)
Big box: 490x290px (980x580px for Retina displays)

We recommend you to upload image with bigger resolution (Retina displays), but this is up to you.

Also, use **Excerpt** text for text you want to publish on your homepage. You can enable Excerpt in Screen Options. If it's enabled Excerpt Box will be bellow **Post Formats**.

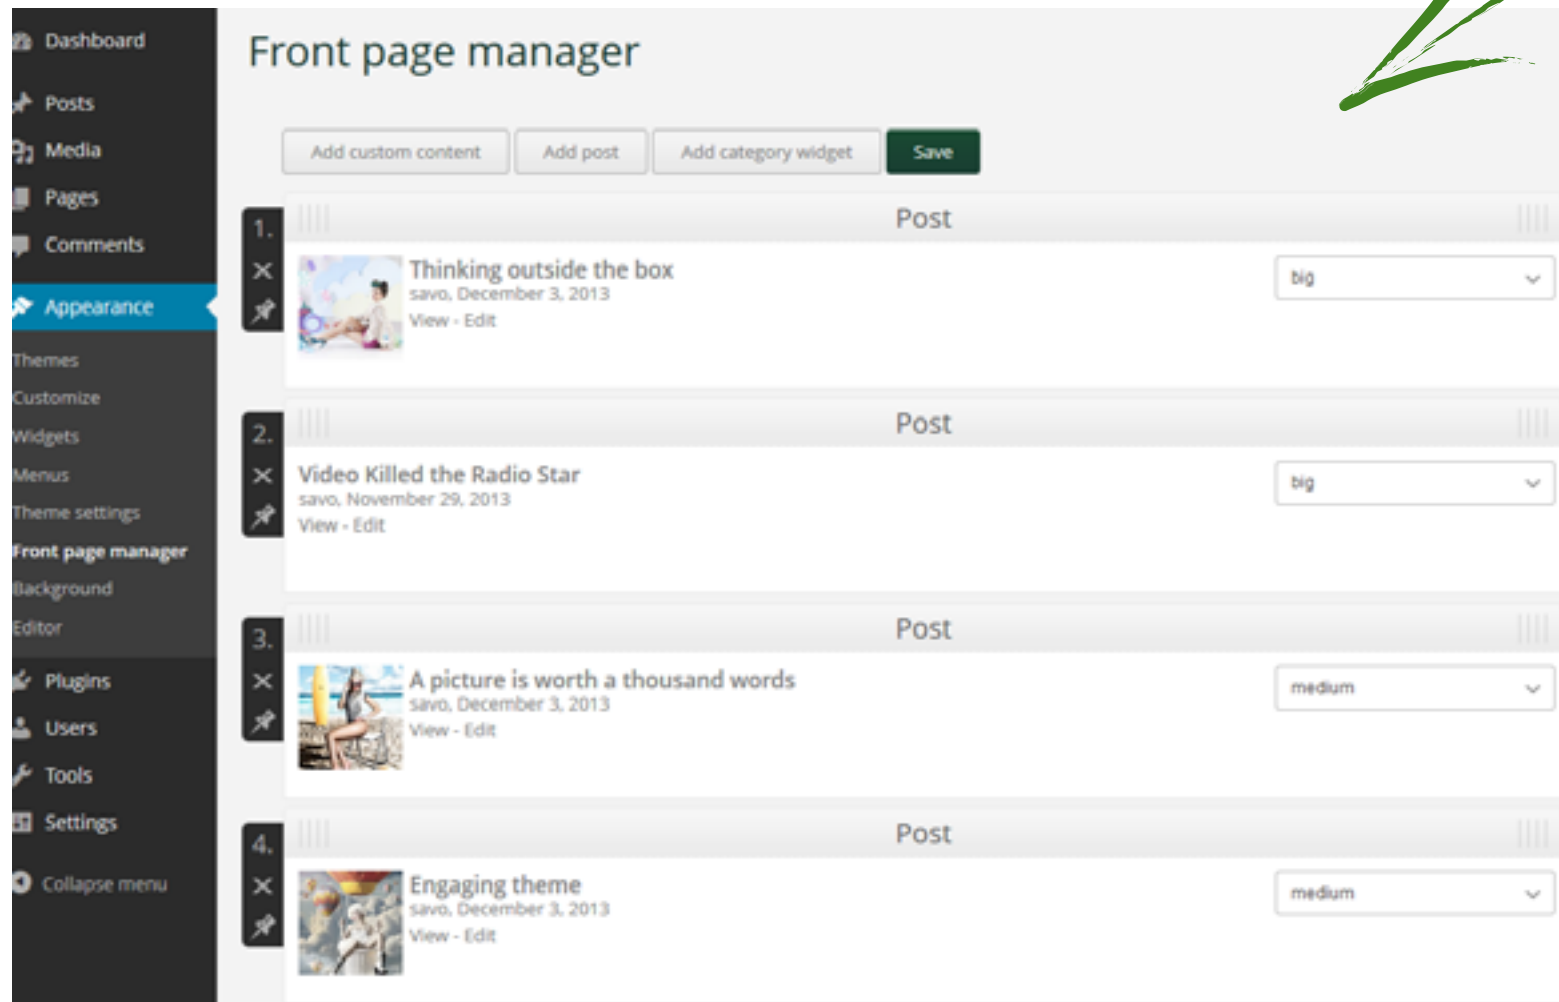

The image shows a 'Featured' settings box. It has a title 'Featured' in a grey header. Below it, the section 'Featured post?' has a checked checkbox. The 'Box size' section has a dropdown menu currently set to 'big'. The 'Secondary image' section has an 'Upload' button.

The image shows the 'Edit Post' screen in WordPress. On the left is a sidebar with 'Posts' selected. The main area shows 'Show on screen' options with checkboxes for Format, Categories, Tags, Featured Image, Featured, Excerpt, Send Trackbacks, Custom Fields, Discussion, Comments, Slug, and Auth. The 'Screen Layout' section shows 'Number of Columns' set to 2. Below this is the 'Edit Post' title bar with an 'Add New' button and a text area containing 'Hello world!'.

Use Front Page Manager (**Appearance > Front Page Manager**) to add Pages, Categories, Custom Boxes or to organize your homepage

Drag & Drop!

You can **PIN** your post on the Front Page Manager. This is really helpful if you want to ensure that certain post stays on the same home page position, regardless of any new post etc.

The screenshot shows the WordPress 'Front page manager' interface. On the left is a dark sidebar menu with options: Dashboard, Posts, Media, Pages, Comments, Appearance (highlighted in blue), Themes, Customize, Widgets, Menus, Theme settings, Front page manager, and Background. The main area is titled 'Front page manager' and contains buttons for 'Add custom content', 'Add post', 'Add category widget', and a green 'Save' button. Below these are two post slots. The first slot, labeled '1.', shows a post titled 'Thinking outside the box' by 'savo' from December 3, 2013. The second slot, labeled '2.', shows a post titled 'Video Killed the Radio Star' by 'savo' from November 29, 2013. Both posts have a red circle with a pin icon next to their numbers, indicating they are pinned. Each post slot also has a 'View - Edit' link.

3.5.NAVIGATION

Use Menus (**Appearance > Menus**) to set up Navigation.

Here is one example for Primary Menu
